

“ I'm a full stack designer and developer with over 10 years experience building web and mobile applications. Most recently I was the co-founder of CrowdHall, an online platform for crowd-sourced Q&As. I'm currently the co-organizer of Meteor Vegas and an active member of the burgeoning startup community in downtown Las Vegas, NV.

EXPERIENCE

⚡ Lead Developer, Differential

SEPTEMBER 2014 – PRESENT • <http://differential.io/>

At Differential, I lead a small, agile team of designers and developers building products for early stage startups and organizations using Meteor.js and other JavaScript-related technologies.

⚡ Co-founder + CTO, CrowdHall

JUNE 2012 – AUGUST 2014 • <https://crowdhall.com/>

CrowdHall was a venture-backed startup that provided a platform for crowd-sourced, Q&A town halls. As CTO I was responsible for all application development, technical infrastructure, product strategy, visual and interaction design as well as managing resources.

⚡ User Interface Engineer, Mightybell

FEBRUARY 2012 – JUNE 2012 • <https://mightybell.com/>

My time at Mightybell was spent assisting in a large redesign and pivot of their existing product. My contributions extended from wireframes and UX flows to user interface development to Ruby on Rails application development.

⚡ Freelancer, Exygen.io

AUGUST 2010 – FEBRUARY 2012 • <http://exygen.io/>

For 2 years I ran my own consultancy where I designed and built greenfield, social web applications for early stage entrepreneurs using Ruby on Rails. Examples include <http://trustthecrowd.com>, <http://popperception.com>, <http://acts.worldvisionyouth.org/> and several others.

⚡ Lead Software Architect, Pride-Media Group

AUGUST 2009 – AUGUST 2010 • <http://pride-media.com/>

I was hired by Pride-Media to lead a team of Ruby on Rails developers. In addition to software development, my responsibilities included resource management, application and server architecture, vendor evaluation, and customer support

⚡ Software Engineer, Digitaria Interactive

MAY 2006 – AUGUST 2009 • <http://www.digitaria.com/>

At Digitaria, I was a member of the FOSS (Free and Open Source Software) Team where we specialized in building large-scale, SaaS applications in PHP and Ruby on Rails for Fortune 500 Companies.
